Django

What's Django?
https://developer.mozilla.org/ko/docs/Learn/Server-side/Django/Introduction

Ⅰ. Development Environment Setup

1. Conda 설치
https://docs.conda.io/en/latest/miniconda.html#windows-installers
conda update conda

2. VSC 설치
https://code.visualstudio.com/download

3. Git 설치
https://desktop.github.com/

4. PostgreSQL 설치
https://www.enterprisedb.com/downloads/postgres-postgresql-downloads

Ⅱ. Preparation

① conda create -n hellodjango python=3.8
② conda activate hellodjango
③ pip install django

Ⅲ. Generate a Starter Django Project
① django-admin startproject hellodjango
② code hellodjango

Ⅳ. Create a Database and Run the Project
① python manage.py migrate
② python manage.py runserver
③ http://127.0.0.1:8000
④ python manage.py createsuperuser

Ⅴ. Practice Using the Admin
① python manage.py runserver
② http://127.0.0.1:8000/admin/
